

“Our mission is to enhance your marketing”

### Testimonials

*“We have used 3DViz on several projects and the results are first class. The staff have always been courteous, professional and prompt to respond to our needs.”*

Roger Grant  
Addcover Homes

*“The accuracy of the visuals from 3DViz was flawless which allowed us to advertise our product confidently.”*

Nathan Senti  
Adenbrook Homes

*“Thank you for helping us develop our marketing material in such a professional manner. Your quality of work is excellent and your friendly service makes our everyday dealings a pleasure.”*

Nicole Yazbeck  
Clarendon Residential

### Presentation

A uniform and consistent look can be achieved across all of your marketing collateral. No need to wait for a fine day to photograph your new display! A unique look and style can be tailored for your visuals and reproduced time and time again.

### Review

With 3DViz you can proof and revise designs early before accumulating significant development cost. 3DViz uses accurate construction details in all our visuals and we work closely with Australian/NZ material suppliers to ensure true to life reproductions of all elements in the design. Review landscaping plans and lighting studies, or preview material selections and colour design for displays or individual client orders. All this can be done with little more than the plan documentation for the project.

3D VISUALISATION FOR  
RESIDENTIAL HOME BUILDERS

 3dVIZ

## Who are we

3DViz is a progressive 3D design studio based on the Gold Coast, Australia. We are 100% Australian owned and all our work is produced in our Australian studios by our in-house multidisciplinary design team. For more than 10 years we have offered an accessible and personalised service to developers, builders and architects across Australia and New Zealand. We strive to offer a friendly and courteous experience and our company has amassed an extensive portfolio of work from the strong alliances we've formed.

## What does 3DViz do

Our mission is to enhance our clientele's marketing. In short, we want to make you look your best! Primarily our focus is with Residential Home Builders and Property Developers, working closely in a supportive role with our client's existing design, drafting and landscaping teams to breath life into both new and established product presentations. Primarily we achieve this using photo-realistic 3D rendered visuals with supporting services of floorplan enhancement and graphic design for web, print and broadcast media.

"Add life and realism to your visuals"

## Services

- Photorealistic exterior & interior architectural visuals
- Animations and Walkthroughs
- Streetscape visuals
- Colour/Material selection images for home buyers
- Virtual 360 Panorama Tours
- Enhanced floorplans
- CAD Conversion
- Supporting design services
- In-house high powered render farm for rapid delivery

## Connection

Our 3D visuals are produced to a photorealistic quality, permitting your customers to establish an emotional connection with your designs. The textures and colours, architectural details and inviting internals all lit beautifully beneath gorgeous skies and lush surrounding landscaping. And all before any real construction has taken place!
